Students are counselled by the mentors, class advisors, subject faculties and HOD for improving their academic performance and attendance. Mentors counsel the students regarding their performance and schedule additional lectures/practical. At first year level, students academic and personal issues of concern are well looked after by the mentors. This way the students realize their responsibilities at the early stage itself. Mentoring is conducted by all departments of the university. The students are given guidance for career and personal areas, besides academic issues. Arrangements are made available to the students to deal with psychosocial issues. Besides this, we have devoted specific slots for mentoring in time-table of several courses. The students who have less attendance and who have missed their internal tests are paid special attention from mentor's side. Even the students with many issues are asked to call parents for parents-mentor meetings. The mentor is also responsible to provide counselling to the student and provide guidance regarding personal and academic issues. The mentor keeps track on their improvements and counsels them accordingly. The role of the mentor is to nurture the students and guide them for any issues they are encountering. Students with personal/family problems if any, are given counselling and support. A large number of students who perceive the professional course as quite focused but feel that may fall short of score require to be promoted to above sections are given counselling by the mentors and the subject teachers. In such a case, additional lectures are also conducted to sharpen the knowledge of students. Students are supported and guided both in co-curricular and extracurricular activities. The mentors of the class discuss with each and every student individually and supports them in all the possible ways to enrich their academic performance. The mentors contact the parents and educates them, if required about their ward's performance. The mentors always keep a

check on the attendance of the student, the marks/grades obtained in the internals externals examinations. A student's candidature in the campus placement is also looked at as a critical area concerning student's overall development.

7.1.2 – Environmental Consciousness and Sustainability/Alternate Energy initiatives such as:

Percentage of power requirement of the University met by the renewable energy sources
The University has installed solar water heaters in various Academics Blocks which ensures utilization of green and renewable sources of energy. The University has installed solar energy panels on the roof of its buildings. The street lights across the campus are being run through solar energy. The University is using CFL, LED and other five-star ratings electrical appliances which consume less electricity via-a-vis illumination and result in lesser energy utilization. Every endeavour has been made by the university to procure electrical equipment which have five star Griha rating or other star ratings as per BEE standard which ensures relatively lesser consumption of electricity

•The buildings are oriented North-South to save electricity during the day. Sensor based energy conservation: The urinals/lavatories have sensor-based taps that enable water conservation. Waste Management- Waste management system has become one of the most important parameters in the development of smart cities and the same has been mandated by Swachh Bharat and Swasth Bharat, Govt. of India. In this regard the institution has taken several initiatives in the management of waste arising from the institution. Liquid waste generated by the institution is recycled through a water waste recycling plant. Two sewage treatment plants (STP) of 128 KLD and 320 KLD have been installed on the campus. These have the capacity to recycle waste water and generate fresh water. The treated water is recycled for gardening, floor washing and sprinkling water on the road during summer season. Rainwater harvesting Rainwater harvesting conserves water as a valuable source and stops it from running off wastefully as sewage water. It provides water during the dry season. It also recharges the reservoirs of the water below the surface of the earth thus raising the level of the underground water table. The Central University of Jammu has many water harvesting pits through which most of the rainwater is captured and thus the runoff is minimized. Five water bodies are being created in the campus with a total water harvesting capacity of 80 lac gallons through watershed development programme. However, roof top rain water harvesting is also being planned. Bore well /Open well recharge: Central University of Jammu is self-sufficient in catering its water requirement through bore wells, whereas in the initial stages water tankers would be used to meet the water demand of the campus, the institution is now not only self-sufficing to meet its own demand as also uses the water resources for meeting expenditure that has been incurred for putting the bore-well Construction of tanks and bunds: Three check dams have been constructed to harvest 80 lac gallons of watershed development programme Waste water Recycling: Two sewage treatment plants (STP) of 128 KLD and 320 KLD have been installed on the campus. These have the capacity to recycle waste water and generate fresh water.

#### 7.1.3 – Differently abled (Divyangjan) friendliness

## 7.2 – Best Practices

### 7.2.1 – Describe at least two institutional best practices

Best Practice 1 1. Title of the Practice: "Creation of Online Systems for Facilitating Governance, Administration and Teaching-Learning" 2. Objectives of the Practice :To ensure fairness, transparency and efficiency in various processes, the Central University of Jammu has adopted the online systems in various areas. 3. The Context :The University has successfully implemented the online systems in place to ensure transparency and commitment to implement the policy of "Zero Tolerance against Corruption" in all processes. As also, ensuring smooth and clear flow of information across 4. The Practice :The University has successfully implemented the following online systems in various areas: • Online No-dues Application and Issues. • Online Application of Email / Wi-Fi Account and Issue. • Online Application for Anti Plagiarism Tool - URKUND. • Online Application for CUJ Domain for Department / Centre / Hostel Website. • University Information Management System. • Online Admissions. • Online Portal for Application and Screening for Non-Teaching Portals. • Online Confirmation of Services of Faculty. • Online Portal for Central Placement Cell for Students and Companies. • Online DIQA Performa. • Online Profile Management of Faculty Members and Non-Teaching Staff. • Online Abstract Submission Academic and Research Profiles of Faculty Members. • Use of virtual classroom software, web-casting and video-conferencing. • Virtual Learning Environment. • Online Platform for conducting Online Classes, Assignments, Webinars etc. for FacultyMembers. • Online Platform for Meetings and various other activities provided to University Officials. • Online Platform for conducting Webinars and other online activities for departments. • Online Examinations. • 100 Payments through PFMS in respect of UGC/MHRD grants. • Online Vendor Bill Processing and Tracking System. • Online Application for Degree in Advance. • Online Application for Request for Special Certificate. • Centralized online admission process for UG, PG, and Ph.D. programmes. 5. Evidence of Success: The University has successfully implemented the online systems in various areas. For example, the university now has in-place centralized online admission process for UG, PG, and Ph.D. programmes. Furthermore, online teaching and learning has become an integral part of education worldwide owing to the unprecedented pandemic situation. Central University of Jammu also adopted online teaching and learning from March 2020 onwards, whereby students are being taught through various online platforms. 6. Problems Encountered and Resources Required: The major problem encountered in implementation is lack of training in the initial phase. The University was able to develop and implement the online systems in various areas through the ICT Centre of University.

Access to digital education to all students was another challenge faced by the University, as many students hail from far flung areas where internet connectivity is a issue. For a substantial period many students were on 2G network as 4G network was restricted in JK. For the students without internet and equipment following measures were adopted: In case a student does not have access to internet and equipment (laptop or desktop), the local administration (including Gram Panchayat) may be requested to provide him/her with access to internet connectivity and equipment for educational purposes In case a student does not have equipment like a Mobile phone, he or she may be advised to purchase it by availing loan facility banks/non-banking financial companies should be requested to provide loan facility with minimal paper work.

Best Practice 2

1. Title of Practice: Internship Embedded Skill Based Programmes
2. Objectives of the Practice: To impart skill training to Indian youth through sectoral specific vocational education programs.
3. The Context: Under "National Skill Qualification Framework (NSQF)" of University Grants Commission (UGC), the Next-Generation Bachelor of Vocational (B. Voc.)" programmes are offered to address the critical knowledge and skill-sets gaps which are required to make the candidate "Industry Ready" and also shape "Young-entrepreneurs" in the tourism, retailing, banking and finance sectors of the economy. The Skill-Development component provides students with appropriate domain based skill, knowledge, practice and professional attitude, so as to become work ready. The general component which is about 40 of the total curriculum gives adequate emphasis to foundational understanding of the domain knowledge and communication skills. The focus is on developing job-specific skills rather than providing only a broad knowledge-based education.
4. The Practice: Central University of Jammu currently offers three B. Voc. programmes in the line of UGC. These programmes are offered level wise the three year degree programme begins with a Diploma course leading to a Bachelor of Vocational Degree [B.Voc.] in the 3rd year. B.Voc. program offers multiple entry and exit options. The program offers three exit options as follows: (1) Diploma after completing one year, (2) Advanced Diploma after completing two years, (3) Bachelor's Degree after completing three years. The Bachelor of Vocational Degree [B.Voc.] programmes incorporate specific job roles and their equivalent National Occupational Standards (NOSS) along with broad-based general education. B.Voc. (Tourism Management), B. Voc. (Retail Management) and B. Voc. (Banking Finance) programmes which are based on contemporary curricula, therefore, provide a new direction and thrust to Skill development in the tourism, retailing and finance which operate in a globally competitive business environment. The practice adopted is called Internship Embedded Skill Training Programme (IESTP) meant to bridge the gap between the real-life business and academic institutions. It provides students with opportunities to apply the concepts learnt in the class-room to real-life situations. As a course requirement, every B. Voc. learner of Central University of Jammu is required to complete an internship.
5. Evidence of Success: Internship Embedded Skill Training Programme provided students an opportunity to earn a modest stipend in skill knowledge sectors-tourism, retail, banking, finance and insurance (BFI). The aim of this 'Earn While You Learn' model is to enable the students to learn the skill by engaging in an internship in the real-life business/industry context. After completing B.Voc. Program graduates have two options available in front of them -take up employment or go for Higher Studies.
6. Problems encountered and resources required: The courses have been a great success with an adequate intake of students during the recent years. The courses could have been more impactful in imparting vocational education to the students of not only this region but also to the students from all across the nation but certain problems have hampered this program. The infrastructural deficiency has been a major jolt in the growth of the vocational education ecosystem since this is a skill-based program and requires retail/tourism/computer labs to impart hands-on training sessions to the students, in absence of which it has

been a great challenge to disseminate knowledge to the respective students.

Part-time/Ad hoc arrangement of faculty members has also been one of the biggest challenges faced by the program, such academic arrangements do not augur well for the program and the course since such faculty members leave the organization and the course midway whenever they get any better opportunity, thus permanent positions should be allocated for the proper functioning of the program and the same faculty member can be held accountable for the outcomes of the courses. Furthermore, financial assistance to these vocational courses for various curricular, field activities, industry interactions, orientation, training, and other related activities should be provided for the smooth functioning of the programs.

He interacts with stakeholders such as students, faculty and other staff through the periodic interactions held by the university. In general there are induction programmes, annual day programme and regular faculty meetings where the leadership interacts with students and faculty respectively. Not only this, he also interacts with the alumni, parents and prospective employers whenever required to meet the emerging needs and challenges of the employment industry and society. By such interactions, the leadership makes sure that the university is moving on the path shown by its vision and mission. The leadership is committed to reinforce the culture of excellence in all the aspects of teaching-learning processes in the campus. All the faculty members are encouraged to impart quality education through traditional and innovative learning practices. The teaching manuals for all courses of all departments have been uploaded on website, so that students can keep a regular track of their course and syllabus. Efforts are also made to

provide a creative academic environment by encouraging independent thinking and exploration. Not only students are supported, but faculty members are also encouraged to produce good academic work and it has been announced that they will be rewarded by the University for any Exemplary Work.
