PH.D PROGRAMME

(2018-19, 2019-20 & 2020-21)

Program Outcomes (PO)

The programme prepares the new generation of scholars, experts and leaders on security and international studies. Since the department is located in the Union Territory of Jammu & Kashmir (J & K), which is considered as a security and strategic hot spot of South Asia, this programme offers to promote academic research as well as policy analysis on issues related to national, regional and international security. It would provide a platform for all the stakeholders to engage in constructive dialogue, and debate on issues related to national security and strategy. Apart from assigned curricula, scholars of the department are introduced to policy analysis using innovative teaching and research skills along with field visits.

Programme Specific Outcome

The programme helps in capacity building for next-generation in critical analyses of strategic issues and generating a pool of national security specialists. It develops analytical skills among scholars to understand and explain subject. The scholars will be able to critically assess various concepts and diverse issues, as well as their contemporary relevance. The programme also develops policy research aptitude among scholars and fosters a thriving research culture to promote policy research on current security issues and challenges. It also imparts indigenous strategic thinking culture and encourages problem-solving techniques and creative strategic thinking culture among students and scholars based on indigenous Indian knowledge system.

PH.D PROGRAMME (2018-19, 2019-20 & 2020-21)

SEMESTER – I

Semester-I, II as the case may be**

PHNSS1C001T- RESEARCH METHODOLOGY IN SECURITY STUDIES

Course Objectives

- Assist students to better understand the structure of the scientific method and the fundamentals of research design.
- Facilitate students to develop empirical research designs, and formulate and test hypotheses by using scientific techniques
- Enable students to become more informed "critics" of social science and security studies literature.

Course Contents

Unit – I Introduction

- Basic assumptions of social science – theoretical and empirical research
- Conceptual foundations of research – concepts, definitions, logic, theory and models
- Basic elements of research in security studies – statement of research problems, unit of analysis, variables and hypotheses and information sources

Unit –II Qualitative Research Methods in Security Studies

- Historical research in security studies
- Case Studies and Comparative Case Studies
- Interviews and Fieldwork & Data Collection

Unit–III Basic Quantitative Research Methods

- Introduction to statistics – descriptive and inferential; Statistical decision theory
- Definition of probability; conditional probability; independent & dependent events.
- Internet survey and social media analysis

Unit– IV Methodological Critique in Security Studies

- Postmodernism – scientific knowledge vs. Narrative knowledge
- Post-structuralism – new approaches in security studies
- Critical security studies

Unit– V Thesis Writing in Security Studies

- Model synopsis – research proposal, review of literature and formulation of hypotheses
- Research design, Analytical techniques and Data gathering, analysis and presentation
- Research ethics – professional codes of ethics

Suggested Readings:

1. Carl G. Hempel; Paul Oppenheim (1948), "Studies in the Logic of Explanation", Philosophy of Science, Vol. 15, No. 2, pp. 135-175 .
2. Clive Seale (2008), Social Research Methods: A Reader, Routledge: London
3. Daniel M. Jones, Stuart A. Bremer and David J. Singer (1996), "Militarized Disputes 1816-1992: Rationale, Coding Rules, and Empirical Applications", Conflict Management and Peace Science, 15:163-213
4. Frankfort-Nachmias, Chava and David Nachmias (1996), Research Methods in Social Sciences, St.Martin's Press: New York
5. John Gerring (2004), "What Is A Case Study and What is it Good for?", American Political Science Review, Vol.98, No.2, pp.341-354

Course Learning Outcomes

The course enables the students to better understand the structure of the scientific method and the fundamentals of research design. It enables students to develop empirical research designs, and formulate and test hypotheses by using scientific techniques. It also facilitates students to become more informed "critics" of social science and security studies literature.
